

## Dementia Capable Webinar Series Post Test:

### “Serving People Living Alone with Dementia” presented by Suzette Binford

Provided by the *Rosalynn Carter Institute for Caregiving*  
In partnership with the *Georgia Division of Aging Services*

#### True or False

1. The term “early onset dementia,” also known as “younger onset dementia,” refers to people whose symptoms of dementia began before the age of 65.
2. The majority of perpetrators of financial abuse of elders are friends or family members who have a relationship of trust with the person.
3. People with dementia who live alone are much less likely to have been diagnosed with dementia than those who live with other people.
4. A common barrier to service delivery for people with dementia is denial of their impairment and/or the inability to understand that they are impaired.
5. For people with dementia, decision making capacity is “all-or-nothing”. If a person lacks capacity in one area, they lack capacity in all areas.

#### Multiple Choice

6. Signs of self-neglect include:
  - a. Malnutrition
  - b. Poor personal hygiene
  - c. Untreated medical conditions
  - d. All of the above
7. Among older adults with dementia who still live at home, approximately what percentage live alone?
  - a. 15%
  - b. 37%
  - c. 55%
