

Dementia Capable Webinar Series Post Test:

“Understanding the Different Types of Dementia” presented by Laura Bauer

Presented by the *Rosalynn Carter Institute for Caregiving*
In partnership with the *Georgia Division of Aging Services*

True or False

1. Dementia is a “catch all” term that describes many different brain diseases.
2. Alzheimer’s disease is the most prevalent type of dementia, representing 60-80% of all cases.
3. Vascular dementia is not the same thing as post-stroke dementia.
4. People diagnosed with Dementia with Lewy Bodies are more likely than those with Alzheimer’s disease to have well-formed visual hallucinations.
5. Those suffering from Parkinson’s Disease often also develop symptoms similar to those of dementia with Lewy bodies.
6. Frontotemporal Dementia includes several types of dementia such as Pick’s disease, primary progressive aphasia, and progressive supranuclear palsy.
7. All forms of dementia are treated in the same way, with the same medications.
8. Creutzfeldt-Jakob Disease results in a rapid death.
9. Several defective genes residing on chromosome 4 cause Huntington’s Disease.
10. Alcohol abuse can severely diminish the production of thiamine.
