

The Rosalynn Carter Institute presents
a Telephone Learning Series session

Evidence Based Programs to Support Caregivers: Real World Implementation Challenges and Solutions

Friday, September 19
2 p.m. ET

Presenter: Karen A. Blase, Ph.D.

Research Professor and Co-Director, National Implementation Research Network

Do you really want to make a difference in the lives of the caregivers your agency supports? Have you heard about evidence-based programs for caregivers, but you're not sure of the steps required to select, install and sustain these programs? This session will address these issues and more. Participants will learn how to make these evidence-based approaches come to life in the real world

Karen A. Blase, Ph.D is Co-Director of the National Implementation Research Network (NIRN) and a Research Professor at the Louis de la Parte Florida Mental Health Institute at the University of South Florida.

She has been a program developer and evaluator, researcher, trainer, and published author in the human service field for over 30 years. Her professional career involved working extensively with agencies and governments in 13 states and 2 Canadian provinces to implement and replicate effective programs.

As Co-Director of the National Implementation Research Network (NIRN), Dr. Blase's major interest is the development, implementation, and quality improvement of exemplary evidence-based programs and practices.

This session will be a prologue to Dr. Blasé's presentation at RCI's National Conference in October.
